PROFESSIONAL SUMMARY

Full-Stack and Desktop Application Developer with extensive experience in building over 20 websites, web applications, and desktop solutions. Notable achievements include the Pharmacy Billing System by Hussain, a comprehensive retail management platform. Proficient in frontend technologies such as HTML, CSS, Tailwind CSS, GSAP, Three.js, JavaScript, TypeScript, Vue.js, and Nuxt. Backend expertise includes Node.js, Express, and Spring Boot. Skilled in creating cross-platform desktop applications using Electron.js and JavaFX. Strong foundation in system design, database architecture, and performance optimisation. Committed to transforming ideas into fully functional products using a broad spectrum of modern technologies.

WORK HISTORY

FREELANCE FULL STACK & DESKTOP APP DEVELOPER

12/2025 - current

Romote | Romote, Pakistan

Developed and maintained full-stack web applications using modern front-end and back-end technologies. Collaborated with clients to design responsive, user-friendly interfaces and implement scalable, efficient server-side solutions, ensuring performance optimisation, security, and adherence to clean code practices across projects.

- For quicker issue resolution, liaised with technical support teams regularly.
- Led a team of junior developers, ensured skill development and productivity.
- To enhance security protocols, integrated cutting-edge encryption tools in apps.
